

Generate Certificate

AUTOMATION PROJECT

#Prompt – Automate certificate work

I have two files: A Word document containing a certificate template with three textbox: <<CANDIDATE NAME>>, <<DATE>>, and <<CERTIFICATE ID>>.

Second File : An Excel sheet with candidate details, structured as follows:

Column A: Candidate ID

Column B: Candidate Name

Column C: Date

Column D: Certificate ID

Write an Excel VBA code for me, Where once I run the VBA code

- 1) First, show a pop-up to select the certificate design Word file.
- 2) Next, show a pop-up to select the destination folder for saving PDFs.
- 3) The macro should replace the textbox inside the Word document using the corresponding data from the Excel sheet it should be dynamically add all the <<CANDIDATE NAME>>, <<DATE>>, and <<CERTIFICATE ID>> of each candidate and generate separated pdf for every candidate.
- 4) Generate a PDF certificate for each candidate and save it in the selected folder.
- 5) Each PDF file should be named using the Candidate ID (e.g., 1001_Certificate.pdf).
